

DCN-DISCS Discussion Unit with Channel Selector

- ▶ Low susceptibility to mobile phone interference
- ▶ Compact, attractive and ergonomic design
- ▶ Pluggable microphone
- ▶ Channel selector with number and abbreviated channel name
- ▶ Built-in loudspeaker
- ▶ Headphone output level reduction to prevent acoustic feedback (active when listening to the floor and when microphone is on)
- ▶ Usable as delegate or chairman unit

The Discussion Unit with Channel Selector enables participants to speak, register a request-to-speak and listen to the speaker. A socket is provided to connect the pluggable microphones (DCN-MICS and DCN-MICL, to be ordered separately). The unit has a built-in channel selector that makes it suitable for discussions in which more than one language is used and simultaneous interpretations are available. The channel selector includes two up and down channel select keys and a display showing the number and the abbreviation of the languages, enabling rapid selection of the required language channel. The unit also accommodates two headphone connections. The built-in loudspeaker speaker is muted when the microphone is on to prevent acoustic feedback. A variety of rims are available, so the unit can be matched to the interior. (DCN-DISR, to be ordered separately). The unit can be used as a delegate unit or as a chairman unit (DCN-DISBCM chairman buttons, to be ordered separately).

To lock the loop-through cable, a cable clamp is available (DCN-DISCLM, to be ordered separately).

The unit is available in light- and dark-colored bases.

Functions

Controls and Indicators

- Alphanumeric display for language channel selection with number and abbreviated channel name
